Education

Sahrdaya College of Engineering and Technology 2024 – 2028
B.Tech in Computer Science and Engineering *CGPA: 9.03*

Minor in Electronics and Communication Engineering Present
Sensors, Actuators, Robotics and Internet of Things

Honors in Cybersecurity Present
Computer Science and Engineering

Carmel Higher Secondary School, Chalakudy 2019 – 2024
Higher Secondary Education (State Board) *97.83%*

Work Experience

Intern June 1, 2026 – June 28, 2026
InternPe *Online*

- Worked on cybersecurity fundamentals through practical exploration of **Metasploitable OS, Nexus, and Wireshark**.
- Developed and tested mini projects for embedded systems using **Tinkercad**.
- Gained hands-on exposure to cybersecurity tools, network analysis, and embedded-system prototyping.

Projects

Ward-Connect Oct 2025

- Designed a centralized digital platform for managing members of a village ward, with an administrator-maintained database and centralized announcements.
- Proposed an integrated auto-booking and calling system to simplify local transportation access for residents.
- Technologies: **Java, Vite, React, HTML, CSS**. Selected as the **Project of the Semester**.

Flight Management System Mar 2026

- Designed a user-friendly flight booking platform with interactive seat selection across flight classes, route visualization, filtering, and price-based search.
- Integrated hotel booking for standby situations, menu-based food ordering, and passenger review functionality.
- Technologies: **Vite, React, Figma, SQL**.

ChatBuddy Feb 2026

- Developed a personal chatbot designed to provide a non-judgmental space for users to express emotions and receive supportive responses.
- Designed the interaction model to prioritize empathy and emotional reassurance rather than criticism.
- Technologies: **Vite, React, Groq API**.

Health Plus Feb 2025

- Developed an AI-integrated health assistance platform featuring symptom-based possible diagnosis, an AI chatbot, BMI calculator, first-aid guidance, medication reminders, and habit tracking.
- Won **2nd place at Tinker Hack** and received an opportunity associated with **KSUM, Kalamassery**.

Slip2Sleep

- Created a lightweight physics-based frontend project for estimating the effect of gravity on a person assumed to fall after slipping on a surface, developed as part of a hackathon.

Technical Skills

Languages: Python, C, Java, JavaScript, HTML/CSS
Web Development: React, Vite, Node.js, Express
AI / Machine Learning: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, OpenCV
Databases: SQL, MongoDB, Supabase
Cybersecurity / Networking: Wireshark, Metasploitable OS, Nmap, Linux, Cisco Packet Tracer
Tools / Platforms: Git, GitHub, Figma, VS Code, Tinkercad, Blender
Professional Skills: Communication, Leadership, Teamwork, Public Speaking, Presentation, Event Management, Project Management, Problem Solving, Creative Thinking, UI/UX Design, Video Editing, Writing, Time Management, Adaptability, Model Creation, Designing, Planning, Systematic Approach

Certifications

Introduction to Machine Learning NPTEL
NPTEL Certification

Introduction to Operating Systems NPTEL
NPTEL Certification

Achievements

- **2nd Place – Tinker Hack:** Health Plus, an AI-integrated health assistance platform.
- **Project of the Semester:** Ward-Connect, a centralized digital platform for village ward management and services.

Additional

Languages: English, Malayalam
Academic Interests: Cybersecurity, Artificial Intelligence, Machine Learning, Embedded Systems, Robotics, Internet of Things
